Summary

- Aspiring Full Stack Developer specializing in MERN stack, focused on building scalable, secure, and user-friendly web applications.
- Proficient in React, Node.js, Express.js, and MongoDB, actively exploring authentication, role-based access, and cloud deployment.
- Passionate about solving real-world problems through code and continuously enhancing skills to contribute to impactful projects.

Skills

Programming Languages: JavaScript

Frameworks & Libraries: React, Node.js, Express.js, MongoDB

Tools & Technologies: Git, GitHub, JWT, Netlify, Render

Concepts: Full Stack Development, RESTful APIs, UI/UX

Experience

Full Stack Developer (Learner / Project-Focused)

July 2025 - Present

Self-Learning Projects

Bengaluru, Karnataka, India

- Developed full stack web applications using MERN stack (MongoDB, Express.js, React, Node.js) for practical experience.
- Applied frontend, backend, and database integration best practices, focusing on modular and maintainable codebases.
- Explored and implemented deployment strategies, cloud hosting, and authentication mechanisms for production-ready applications.

Projects

E-commerce Application

- Designed and implemented a full-stack e-commerce platform using MERN stack, integrating user authentication and product management.
- Developed RESTful APIs with Node.js and Express.js for product catalog, shopping cart, and order processing functionalities.
- Utilized MongoDB for efficient data storage and React for a dynamic, responsive user interface.

Blog Platform

- Built a dynamic blog platform with MERN stack, enabling users to create, read, update, and delete posts.
- Implemented JWT authentication for secure user access and role-based authorization for content management.
- Deployed the application using Netlify/Render, ensuring continuous integration and accessibility.

Real-Time Chat Application

- Developed a real-time chat application leveraging MERN stack, demonstrating proficiency in WebSocket integration for instant messaging.
- Managed user sessions and message persistence using MongoDB, ensuring a seamless communication experience.
- Focused on responsive design and efficient data handling to support concurrent users.

To-Do Application

- Created a comprehensive To-Do application using MERN stack, featuring task creation, editing, deletion, and status updates.
- Implemented robust backend APIs with Node.js/Express.js and a responsive frontend with React.
- Ensured data persistence and user-specific task management through MongoDB integration.

Education

Rani Channamma University, Belagavi

2023 - 2026

Certifications

- Certificate of Participation – Masterclass on Roadmap to Becoming a Full Stack Developer
- Vibe Coding 101 with Replit
- Deloitte Australia - Technology Job Simulation
- From Idea to Interface: A UI/UX Guide to Lovable AI Tools – Masterclass (PW Skills)
- Web Designing Basics
